

ANNUAL REPORT OF THE CIAM SPACE MODELS WORLD CUP 2022

By Dr. Zoran M. Pelagic,
CIAM Space Models SC Chairman

Andrija Ducak
Space Models WC Coordinator

Prievidza (Slovakia), 30 October 2022

There were scheduled 20 Space Models World Cup events in 11 countries in America, Asia and Europe registered to the FAI Contest Calendar 2022 – Space Models. Due the geopolitical situation, some of them were cancelled – mostly Asian region. At one World Cup two classes were canceled due low attendance, mostly classes S7 and S8E/P were neither registered to the Contest Calendar nor flown. Most of the organizers were very correct in preparing and sending results lists and reports in terms of days, so the current placing lists were published after each event. This contributed very much to the dynamics of this competition, which almost came back to normal after a two year's brake.

A total of 947 competitors from 21 countries (from which 11 were also organizing at least one SM World Cup event) from America and Europe participated in the 2022 Space Models World Cup season. A detailed list of participating countries in alphabetical order can be found below:

Bulgaria (2), Canada, Czech Republic, Croatia, Estonia, Germany, Great Britain, **Latvia (1)**, Lithuania, **Poland (1)**, Romania, Serbia, **Slovak Republic (2)**, **Slovenia (1)**, Switzerland, Turkey, Ukraine, **USA (4)**, Uzbekistan. **Bold** are countries that also were the organizers of the SM World Cup events and the number of organized World Cup events in the country is set in ().

Complete tables with allocated points for all sportsmen having at least one official flight are available in electronic form at the FAI Web site <https://www.fai.org/ciam-documents> under S-SPACE MODELS - World Cup → 2022 → Results, Reports and Bulletins. Final results were distributed to all FAI SM lists and lists of WCup organizers.

CONCLUSION: The number of World Cup competitions is getting back to normal as prior to the pandemic. The number of World Cups returned to the standard, if we consider the fact the several “strongly visited” competitions were not held. The total numbers of competitors in classes S4A, S6A and S9A compared to the past can be considered stable. The “king” classes S7 and S8E/P remained with a stable number of competitors due their complexity. This shows the attractiveness of these two classes and that rule changes adopted in 2018 and 2021 attracted more people, especially juniors, to enter these classes. Traditionally, Space Models World Cups stay the main and most effective way to promote this kind of sport.
