

Object:

authorization to conduct the next world championships hang gliding class 1 2010 and 2011.

With this letter we acknowledge the FIVL request to hold the next world championships hang gliding class 1 2010 and 2011 .

According to Italian law, it is necessary to point out that ENAC is the only authority in Italy for the Civil Aviation and Air transportation with tasks of regulation, certification and vigilance. In the development of own institutional activities ENAC promotes the development of Civil Aviation guaranteeing flight safety, protecting the rights, quality of service and fair competition in the environment.

In the next world championship event with VDS equipment without engines, for which the regulatory framework gives to Aero Club d'Italia control functions on the event, only a local authority approval is required if the event is considered as public spectacle. ENAC's role is limited to the adoption of clearance after verification of compatibility with other business aviation and air traffic.

If the event will be assigned to Italy by the FAI, ENAC will ensure its availability in collaboration with other institutions in their respective areas of competence. Just as happened to the women's World Cup of 2008.

Best regards

Mr. Riccardo Perrone
ENAC Director
