## **IPC Controlller Judging and Scoring**

### **MONDIALS 2003, Gap, France**

Doris Merz-Hunziker,

According to the Sporting Code Section 5, 4.1.1.(8) I submit a report to the IPC Secretary

I will highlight only a few points since each Chief-Judge is writing his/hers own report.

#### **Prior to Competition:**

In early June this year I had my first meeting in Gap with the Organizer, Patrice Girardin, I got a first view on the site and the judging areas in general. It was then we discussed all the arrangements necessary for judging the different disciplines. We also looked into the setups for dubbing and all the technical material that will be needed to fulfil the requirements according to the Sporting Code and the Competition rules.

According to the SC 5, it was my duty to prepare and coordinate arrival/transportation and accommodation for all the judges. Since the Organizer was paying also for the Judges travel expenses, Patrice already had the necessary information from the individual Judge, so he dealt with all this directly.

This matter was at length discussed during that first meeting in Gap.

#### **At the Competition:**

I arrived in Gap 3 days prior to Competition, as did the Chief-Judges.

All the requested technical equipment was on site – together with the CJ we arranged the different judging rooms and made the necessary connections with the dubbing stations. The plan was, judging from life-dubbing. But the training jumps showed us different. With up to 6 Pilatus Porters in the air at the same time, and the disciplines mixed, it was much faster if all the jumps were recorded on tape and judged from there. Arrangements had to be made that afternoon and ready to run by next morning, when competition jumps started.

It showed once more that it is absolute necessary that one person is in charge of all the coordination between Chief-Judges and Organizer. So the adjustments could be made fast and effective.

4 dubbing stations were used, and each with two recording systems. One tape per team went to the Judges and the other was the mastertape.. It worked out very well for all disciplines.

For transportation on site each Chief-Judge had a large Mini-Van from the organizer, and together with private cars it was sufficient for all needs of the judges.

On a competition as complex as the Mondials are, communication is very important. Getting information from the Manifest during the day was a big challenge. It was also due to an completely open daily schedule.

The collaboration between the organizing staff, the FAI Controller Srecko Medven and the Chief-Judges was exceptional good and all the smaller and bigger problems got solved in a short time period. Herewith I like to express my thanks to all persons involved.
