7. General considerations

Although ballooning is apparently doing well, the activity is struggling with the same problems as other Air Sports Commissions (air space, licensing, airworthiness, equipment, medical, etc.), and in addition with some homemade ones that have not yet been properly addressed by us:

- safety issues at our events,
- modernisation of our existing competition formats,
- development of attractive sporting events for the media and public,
- communication with the grass roots balloonists,
- rapid aging of our pilot population and the difficulties to recruit new pilots,
- small proportion of female pilots and competitors.

These are the major challenges for ballooning in the future, and we are grateful for the assistance provided by the FAI Members to help us tackle these issues. NAC support is vitally important and only through the participation of their delegates in our Commission's work can we achieve positive results. It is my honour and pleasure to acknowledge the support provided by our delegates, the FAI Secretary General and his staff in Lausanne, and to sincerely thank them for their efforts on behalf of the CIA.

J.C. Weber,
President, CIA
