

ANNEX 6 G - SCALE WORLD CUP RULES

6G.1. Classes.

The following separate classes are recognised for World Cup in Scale

F4B - Control Line Scale

F4C - Radio Control Scale

6G.2. Competitors

All competitors must have a current FAI Sporting Licence

All Competitors taking part in the open international contest specified as World Cup Contest, are eligible for World Cup points.

6G.3. Contests

Contests included in the World Cup must appear on the FAI Contest Calendar and be run according to the FAI Sporting Code. The contests to be counted for a World Cup in a particular year are to be nominated at the CIAM Bureau Meeting at the end of the preceding year and are to be indicated on the FAI Contest Calendar. (Proposals for inclusion of an event into the World Cup Calendar must reach the FAI office before November the 15th for the following year). The selection of the contests for each class should be according to the following guidelines:

1. A maximum of two contests in each class may be selected for any one country.
2. Each competitor may count only one competition from each country in Europe (taking the better score for any European country in which he has scored in two competitions).
3. In all other FAI defined Regions (See Sporting Code General Section) the competitor can count the points earned in two contests in any one country.
4. Minimum number of Competitors necessary to make the event count as a World Cup event is 7.

6G.4. Points Allocation

The points to be allocated to competitors will depend in each class on the number (N) of competitors who will have scored flight points in the event.

Points are allocated to competitors who will have scored flight points according to their placing in the results list as given in the following tables:

Basic points

1. $N > 20$

Placing	1	2	3	4	5	6	19	20	21
Points	20	19	18	17	16	15	2	1	0

2. $N = 20$ or $7 < N < 20$

Placing	1	2	3	4	5	6	7	(N-1	N)
Points	N	N-1	N-2	N-3	N-4	N-5	N-6	(2	1)

Bonus points:

- 2.1 For first: $N/3$ rounded up to nearest whole number of points with a maximum of 7 points.
- 2.2 For second: $N/5$ rounded up to the nearest whole number with a maximum of 4 points
- 2.3 For third: $N/7$ rounded up to the nearest whole number of points with a maximum of 3 points

In the event of a tie for any placing, the competitors with that placing will share the points that would have been awarded to the places covered, had the tie been resolved. (Round up the score to the nearest whole number of points. That is, if two competitors are tied for third place, add the points awarded for third and fourth place, including bonus points for third and divide by two.

If the competition have 15 competitors the calculation is as follows:

3rd place gives $15-2=13$ +bonus $15/7=2,1''3$ + fourth place $15-3=12$ gives a total of $13+3+12=28$ divided by 2 gives each competitor 14 points).

6G.5. Classification

The World Cup results are determined by considering the total of points obtained by each competitor in the World Cup events. Up to three events may be counted, selecting each competitor's best scores during the year. The winner of the World Cup is the competitor with the greatest total.

In the event of a tie for first, second or third place, the placing will be determined according to the following scheme:

The number of events counted is increased from three, one at a time, until the placing is obtained. If this does not separate the tied competitors, then the winner will be determined by considering the best three events. The points obtained in each event multiplied by the number of competitors who will have scored flight points in the event, the winner is the one with the greatest total thus calculated.

6G.6. Awards

The winner is awarded the title of the Winner of the World Cup. Further medals, trophies or certificates awarded by the CIAM Scale Subcommittee as available.

6G.7. Organisation

The Scale Subcommittee shall be responsible for organising the Scale World Cup and may nominate a responsible person or persons to collect the results. The address to use will be published to all World Cup organisers.

6G.8. Communication

The Scale Subcommittee should receive the results from each contest in the World Cup and then calculate and publish the current World Cup positions. These should be distributed to the news agencies and should also be available, by a payment of a subscription to any interested bodies or individuals. Final results of the World Cup are also to be sent to the FAI, National Airports Controls and model aircraft press.

6G.9. Responsibilities of World Cup competition Organisers

Competition organisers must propose their event for inclusion into the World Cup Calendar when nominating events for the FAI International Sporting Calendar. The CIAM Bureau as defined in paragraph 6D.3. makes the final selection of events from these proposals. Immediately after the event, the competition organiser must send the results to the World Cup responsible body, at least within one month, as required under Sporting Code B.6.5. Any failure to return results promptly will be reviewed by the CIAM Bureau when considering the competition calendar for the following year.

6G.10. The Jury and protests

A jury consisting of three persons will be nominated by the CIAM Scale Subcommittee to rule on any protest concerning the World Cup during the year. Any protest must be submitted in writing to the Scale Subcommittee Chairman and must be accompanied by a fee of CHF 80,-. In the event of the Jury upholding the protest, the fee will be returned.
