Subject: PROVISION OF RESULTS

Dear All,

Every year we have great difficulty in obtaining the official final results of FAI Championships. This puts us in a ridiculous position - the FAI office unable to tell enquirers what the results of our own championships are.

Experience tells us that we cannot rely on what appears on web-sites. Frequently, there are discrepancies between the results that appear on websites and the final official results signed by Jury President.

The FAI Sporting Code - General Section says the following:

3.16.2 NOTIFICATION OF RESULTS

3.16.2.1 The officially accepted entry list and results of a First Category Event shall be received at the FAI Office within eight days of the end of the event. The results of any FAI air sport event shall be given in writing to the organising NAC, all competitors and the NACs they represent without delay. (AL4)

We feel that 8 days is much too long in the modern age. That rule dates back to the time when post was used to transmit urgent documents. Could CASI consider reviewing this rule so that an obligation is placed on someone specific to send us official results (ie avoid use of the passive voice), and so that the time limit is drastically reduced?

If results are made public, FAI Office should be the first to receive them. As it is, Christine Rousson here spends half her summer chasing late results...

Many thanks in advance for your understanding.

With best regards,

Max Bishop
Secretary General
Fédération Aéronautique Internationale
